PROFILE

Versatile and results-driven Software Engineer with hands-on experience in FinTech, specializing in mobile (iOS/Android) and backend development. Known for strong system design, cross-functional collaboration, and a drive for innovation. Passionate about building scalable, secure solutions and continuously growing through new challenges and technologies.

EXPERIENCE

Digledge

01/2024 – present | Bangalore, India

Software Engineer

1. Central Bank Digital Currency (CBDC)

Role: iOS Developer | Android Developer | Backend Developer (Go)

- Developed and maintained the CBDC retail app for three major banks (Indian Bank, Federal Bank, Karnataka Bank) using Swift (UIKit) and Objective-C.
- Contributed to Android development using Java for both retail and merchant apps.
- Designed and implemented backend services in **Go (Golang)** for secure digital currency transaction processing.
- Integrated RESTful APIs and managed shared SDKs for token lifecycle and payment authorization.
- Focused on secure, scalable architecture ensuring compliance with **RBI regulations** and **CBDC guidelines**.
- Collaborated directly with banking partners for requirement gathering, issue resolution, and release coordination.

2. Marketplace

Role: Product Manager | Mobile SDK Developer (iOS/Android) | Backend Developer

- Designed and developed SDKs for both **iOS (Swift)** and **Android (Java)** to enable integration with partner applications.
- Created and maintained **modular iOS frameworks** and **Android libraries**, ensuring performance and ease of use.
- Built scalable backend services using **Java (Spring Boot)**, containerized with **Docker**, and deployed to cloud infrastructure.
- Managed **product changes, complaints, and enhancement requests** by collaborating directly with stakeholders and end clients.
- Led product planning and coordination, aligning technical efforts with business goals.

3. SoftPOS

Role: Mobile & Backend Developer

- Designed the **overall system architecture** and technical flow for the SoftPOS payment platform.
- Developed **NFC Tap and Pay** functionality for **RuPay cards** on Android using **Kotlin and Java**.
- Developed backend services in **Go (Golang)** for managing secure payment transactions and integrations.
- Focused on PCI-compliant transaction flows, real-time processing, and platform reliability.

EDUCATION

B.E. - Computer Science and Engineering

2020 – 2024 | India

A.V.C. college of engineering, affiliated to Anna University

PROJECTS

Confab: Cross-Platform Chat App - Flutter/Firebase Mastery [🔗](#)

- Developed a versatile chat app using Flutter and Firebase for seamless functionality across Android, iOS, and web platforms.
- Implemented robust user authentication and real-time messaging functionalities leveraging Firebase Authentication and Cloud Firestore. Utilized Balsamiq for wireframing and Figma for UI design iterations.

Pixel Perfection - Image quality increaser and editor(Full stack) [🔗](#)

- Created a robust web application using HTML, CSS, JavaScript, and Python (Flask), ensuring a user-friendly image editing experience.
- Utilized Docker for containerization and IBM Cloud (Db2 and Kubernetes) for efficient database management.

Advanced AI virtual assistant [🔗](#)

- AI Voice Interaction: Developed an AI voice assistant using Python, enabling intuitive user interactions through voice commands, facilitating various tasks such as web browsing, system controls, music playback, and more.
- Diverse Functionality: Implemented a wide array of functionalities allowing the assistant to open applications, execute system commands, perform web searches, capture images, and handle tasks based on user voice commands.
- Seamless User Experience: Engineered a user-friendly interface for smooth interactions, providing users with an efficient and responsive voice-controlled assistant experience.

DocuSenseAI [🔗](#)

- Developed a Python-based system using Transformers API for PDF analysis and Natural Language Processing (NLP) for question-answering.
- Utilized machine learning techniques for information retrieval from user-uploaded PDFs.

SKILLS

- | | |
|--|---|
| • Languages: Swift, Java, Kotlin, Go, Dart, JavaScript, Python, C/C++, PHP | • Mobile: iOS (UIKit, SwiftUI, Objective-C), Android (Java/Kotlin), Flutter |
| • Backend: Spring Boot (Java), Go (Golang), Flask, Node.js | • Databases: MySQL, PostgreSQL, SQLite, MongoDB, OracleDB |
| • Tools/Platforms: Git, Docker, Kubernetes, Bitbucket, Firebase, Hadoop | • UI/UX: Figma, Balsamiq, User Research, Wireframing |

CERTIFICATES

Google-Crash Course on Python [🔗](#)

Skills: Python (Programming Language) · OOP

Udemy-HTML 5,Python,Django And Flask Framework Full-Stack Course [🔗](#)

Skills: flask · HTML5 · Python (Programming Language) · Django · Flask

Edureka-Big Data Analytics [🔗](#)

Skills: Java · Hadoop · Flume

IBM-Project on Pixel Perfection: Transforming your photos with our cutting-edge image editing platform [🔗](#)

Skills: flask · HTML5 · JavaScript · Python (Programming Language) · Cascading Style Sheets (CSS) · Docker · IBM db2

Udemy-React.JS Crash Course: The Complete Course [🔗](#)

Skills: React.js
